### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: With regards to the claims 38-47 and 49-54, the prior art of record does not disclose or fairly teach a central axis about which is disposed a plurality k of cylindrical feed waveguides, each said feed waveguide having a radius, an input port and a launching port, all centered on a feed waveguide axis, said launching port including a cylindrical helix; a plurality k of focusing reflectors, one for each said feed waveguide, each said focusing reflector centered on said feed waveguide axis; a final waveguide coaxial to said central axis and collecting power reflected by each said focusing reflector with a proximal final waveguide reflector port. With regards to claims 55-69, the prior art of record does not disclose or fairly teach a plurality k of feed waveguide cylinders, each said feed waveguide cylinder having a feed waveguide axis and a radius; and also having a launch end which includes a helical cut ramp. With regards to claims 70-84, the prior art of record does not disclose or fairly teach k feed waveguides, each said feed waveguide formed from a 4 sided polygon conductor comprising a rectangle having a width and height adjoining a triangle having same said height, said polygon then rolled into a cylinder with a feed waveguide axis substantially parallel to said rectangle width thereby forming said feed waveguide, said feed waveguide having a feed waveguide radius about said feed waveguide axis and a feed waveguide launch end adjacent to said triangle.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: True US Patent 4,074,265, Hsu et al US Patent 4,590,446, Mallavarpu et al US Patent 5,142,253, Aves et al US Patent 5,880,648, Stones et al US Patent 6,242,984, Mobius et al US Patent 6,919,776 and Kinman et al US Statutory Invention Registration H664.
